Section (F) :Reduce Family Size in the Country

In a country where income is low, most people live in rural areas, access to health care is poor, and most couples give birth to at least six children, suppose a smaller family size program is implemented to encourage couples to give birth to no more than 3 children. I will read a list of things this smaller family size program might change. Please tell me whether this program if implemented successfully will increase or decrease them.

		Increase	Neither, About the same(if vol.)	Decrease
1.	Over time will a successful implementation of a smaller family size program will <u>increase</u> or <u>decrease</u> the overall standard of living?	1	3	5
2.	Families having television sets in their homes (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5
3.	The fraction of children dying before their first birthday (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5
4.	Being educated (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5
5.	Sick people visiting a local healer rather than visiting a medical doctor (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5
6.	The difference in income between the rich and the poor (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5
7.	Love and understanding between parents and children (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5
8.	The fraction of people working on farms (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5
9.	Respect for elders (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5
10.	Equality between women and men (-over time, will increase or decrease after a successful implementation of a smaller family size program)	1	3	5
11.	The morality of the people (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5
12.	Orphi marriage (over time will <u>increase</u> or <u>decrease</u> after a successful implementation of a smaller family size program?)	1	3	5

Section (G): Increasing the Age at First Marriage in a Country

In a country of low income, most of people living in rural areas, access to healthcare is poor and most females get married at the age of 16, suppose that country implements a program to increase the age at first marriage until at least the age of 20. I will read a list of things that might change after the implementation of older-age-at first marriage program. Please tell me what are the things over time, that might increase or decrease in that country?

		Increase	Neither, About the same (if vol.)	Decrease
1.	Over time, the overall standard of living will <u>increase</u> or <u>decrease</u> after a successful implementation of an older-age-at marriage program?	1	3	5

Section (I): Equality between women and men

We would like you to think about equality between women and men in different countries around the world. We will talk about different groups like England and Mongolia. Using the equality scale that ranks equality between women and men from zero to ten. The countries with the least equality between women and men are rated zero while the countries of the most equality between women and men are rated ten. You can use both of those numbers for rating countries plus all the numbers in between.

For the interviewer: Hand the equality scale to respondent.

1.	Using this equality scale, where would you put <u>Japan</u> ? (For the interviewer: if the respondent asks, you may tell him “Zero is the least equality between women and men, ten is the most equality”	Scale (0-10)..... <input type="text"/> → Does not know..... 98	3
