

D.A. Country Development Scale

I would like you to think about levels of development in different countries worldwide. We shall mention countries like England, Sudan and other countries and ask you to rate the development of each country from one to ten. Countries that are least developed are rated as zero, while those countries that are most developed are rated as ten. You can also use any number between zero and ten. **HAND DEVELOPMENT SCALE SHOWCARD TO RESPONDENT IF THIS IS A FACE-TO-FACE INTERVIEW.**

DA 1	By using that measure of development, where do you put Japan ?
