Instruction to Interviewer:

Clearly read the following statement compulsorily to all the respondentst so that S/he understands it.

This research aims to study the views of people in Chitwan about various aspects of individual's personal, family and social life and its impact on their behavior and life outcomes. The questions will be about your ideas concerning economic, social, and family organization. Your responses to these questions will be analyzed at a group level and individual identity will not be revealed in any analyses. The outcome of the analyses will be used for teaching, policy formulation and public information.

This interview is completely voluntary . Even so, your cooperation has immense importance to make the study a success. If we should come to a question which you don't want to answer, just let me know and we will go to the next question.

Thank you for your help!!

If you have questions concerning your participation in this study, please contact principal investigator Professor Arland Thornton or The University of Michigan Institutional Review Board office at the following contact addresses:
